User roles

PLANEXA

Discover. Organize. Experience.

An all-in-one university event management platform built for admins, organizers, and students.

Hackathon Track: Smart Automation | Software | AI & Web

Team members:

NAME	Email	College / Organization	Role
Chharvvi Batra	chharvvibatra.ec24@scet.ac.in	SCET	Frontend & UI
Heer shah	heershah.aids24@scet.ac.in	SCET	AI/ML
Saumya shah	saumyashah.ec24@scet.ac.in	SCET	Backend
Unnati vamja	unnativamja.ec24@scet.ac.in	SCET	Research & Documentation

The Problem

Current Pain Points

- Events scattered across emails, WhatsApp & noticeboards
- No easy way for students to discover & register
- Organizers manage Excel sheets manually
- Admins approve events through back-and-forth emails
- Zero visibility into attendance or feedback
- No attendance record, no certificates, no analytics
- Students miss events — zero discovery

Our Solution

Planexa Fixes This

- One platform — all events in one place.
- Students browse, filter & register in seconds
- Organizers manage participants, waitlists & QR tickets.
- Admins approve via dashboard with notes & chat
- Analytics, attendance tracking and
- feedback built-in

1

Organiser Submits Event

Title, venue, date, capacity, category

2

Admin Reviews & Approves

Conflict check, one-click approval

3

Student Discovers

Filter by category, live capacity bars

4

Student Registers

Instant confirm + QR e-ticket issued

5

Post-Event Certificate

Attendance marked, cert auto-generated

8 features that make Planexa a complete platform.

Live Polls

In-app voting with animated result bars

Hackathon Leaderboard

Real-time team rankings with points

Interactive Calendar

Event dots — click any day to view events

Shareable Event Links

URL hash deeplinks — public preview without login

QR Ticket System

Real QR codes · organisers can scan at the gate

Certificate Generator

Digital certificate generated in-browser

Notification Prefs

Students control which alerts they receive

Smart Back Navigation

History stack — breadcrumb nav across all views

3 ROLES. ONE PLATFORM.

Student

Discover & Experience

- Browse & filter campus events
- Register in one tap
- Get QR e-ticket instantly
- Join waitlist if event is full
- View calendar of all events
- Give feedback post-event
- Download certificate

Organiser

Create & Manage

- Create events with full metadata
- Manage task board & progress
- Team group chat in-app
- View all participant details
- Mark attendance on event day
- Track payment status
- Live 4-chart analytics

Admin

Approve & Oversee

- Approve or reject proposals
- Auto conflict detection
- Direct chat with organisers
- College-wide analytics
- Manage all campus venues
- View organiser profiles
- Events this month overview

HOW WE BUILT IT:

Vanilla JS + HTML5 + CSS3

4,500+ lines · custom VIEWS{} rendering engine · no React, no build step

Custom CSS Design System

CSS tokens for colours, spacing, shadows · 20+ reusable component classes

Firebase Auth + Firestore

Role-based login · real-time data sync · full demo mode without Firebase

Chart.js 4.4

Bar, doughnut, line, gauge charts — all computed live from event data

Context-aware Search

Switches result types by current screen — events, participants, organisers

Netlify Deployment

One-push global deploy · instant CDN · URL hash deeplinks for public preview

Tech Stack — Architecture Layers

Browser Layer — UI

Vanilla HTML5 · CSS3 · JavaScript ES6+ · Single-file architecture

Design system

CSS vars · tokens · Syne + DM Sans

Role-based router

admin · organizer · student

Chart.js 4

Analytics · feedback charts

App State — In-memory Store

Single source of truth · persists across logins · resets on full refresh without Firebase

EVTS

Events array

REGS / WAIT

Registrations + waitlists

USER_NOTIFS

Per-user inbox

CHATS · FEEDBACK

Per-event data

Backend — Firebase (optional)

App runs in demo mode with window.FB shim when FIREBASE_CONFIG is null — zero config required

Firebase Auth

Email sign-in · real accounts

Firestore

Sync events + registrations

FB shim (demo)

window.FB — in-memory fallback

IMPACT

Who benefits. How much.

3,000+

Students at SCET

Can discover every event instantly

50+

Events per semester

Managed without WhatsApp chaos

Days→Mins

Admin approval time

Email threads to one-click

100%

Post-event data captured

Attendance, feedback, certs stored

VISION BEYOND SCET

Scalable to any college in India. Multi-institution deployment with isolated data per campus. The same platform works for a 500-student college or a 15,000-student university.
